Dear Customers,

Candles are often regarded as living light. The greater the personal and creative touch given to these light sources during their manufacture and design, the more this perception will hold true.

In this catalogue you will find everything that you need – from the raw materials required for manual candle making, via the proven equipment and moulds, right through to a wide range of decorative materials.

In addition to individual innovations in our candle mould range, you will find attractive new relief rollers and candle stamps on pages 64 and 65. These can be used to decorate candle surfaces simply and effectively.

Take advantage of our numerous workshops (in German) to get started on the delightful craft of manual candle making and/or soap making. You will find the course topics and our constantly changing promotions and special offers at www.exagon.ch.

Thank you for your valued orders – we are very much looking forward to continuing working with you in future.

Kind regards,

A handwritten signature in black ink, appearing to be 'JM' or 'J. Müller', written in a cursive style. Below the signature is the printed name 'Josef Müller'.

Josef Müller

Beeswax

60% beeswax, 40% paraffin
Pellets (25 kg bags)

Proven top quality for
hand-dipped candles

Art. 11100

1 –	24 kg	€ 17.90/ kg
25 –	49 kg	€ 15.10/ kg
50 –	99 kg	€ 14.25/ kg
100 –	299 kg	€ 13.40/ kg
300 –	599 kg	€ 12.45/ kg
as of	600 kg	Price on request

Beeswax 100% pure

Pellets (25 kg bags)

Precious beeswax for
very special candles

Art. 11200

1 –	24 kg	€ 24.30/ kg
25 –	49 kg	€ 20.60/ kg
50 –	99 kg	€ 19.60/ kg
100 –	299 kg	€ 18.60/ kg
as of	300 kg	Price on request

Bleached beeswax 100% pure

Pellets (25 kg bags)

For altar candles

Art. 11300

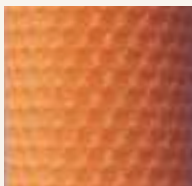

1 –	24 kg	€ 25.70/ kg
25 –	49 kg	€ 21.80/ kg
50 –	99 kg	€ 20.70/ kg
100 –	299 kg	€ 19.70/ kg
as of	300 kg	Price on request

Honeycombs (central walls) 100% pure, 20 × 35 cm

For making rolled candles
(simple cold process)

Art. 11400

1 –	19 kg	€ 31.40/ kg
as of	20 kg	€ 25.40/ kg

1 kg = env. 16 rayons

Stearin pure, vegetable, white (25 kg bags)

To mix in with paraffin (10 – 20%)
Pure stearin candles have a
crystalline structure.

Art. 12300

1 –	24 kg	€ 5.80/ kg
25 –	49 kg	€ 5.30/ kg
50 –	99 kg	€ 5.05/ kg
100 –	299 kg	€ 4.85/ kg
300 –	599 kg	€ 4.70/ kg
as of	600 kg	Price on request

Craquelle-effect wax (white)

Pellets (25 kg bags)

Wax for pouring candles with a
craquelle effect. With instructions!

Art. 12650

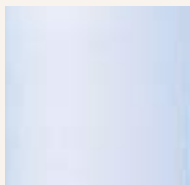

1 –	24 kg	€ 5.90/ kg
25 –	49 kg	€ 5.40/ kg
50 –	99 kg	€ 5.15/ kg
100 –	299 kg	€ 4.95/ kg
as of	300 kg	Price on request

Paraffin pure, white

Pellets (25 kg bags)

For dipped and moulded candles
Slightly glassy, transparent candle
surface.

Art. 12200

1–	24 kg	€ 5.30/ kg
25–	49 kg	€ 4.80/ kg
50–	99 kg	€ 4.55/ kg
100–	299 kg	€ 4.35/ kg
300–	599 kg	€ 4.20/ kg
as of	600 kg	Price on request

Paraffin/stearin, white

80% paraffin, 20% stearin

Pellets (25 kg bags)

For dipped and moulded candles.
Opaque white candle surface.

Art. 12100

1–	24 kg	€ 5.60/ kg
25–	49 kg	€ 5.10/ kg
50–	99 kg	€ 4.85/ kg
100–	299 kg	€ 4.65/ kg
300–	599 kg	€ 4.50/ kg
as of	600 kg	Price on request

Rapeseed wax, ivory

Pellets (25-kg bags)

For moulding candles (very easy to de-
mould!) and for candles in glass pots.
Porcelain-like, pastel-coloured look

From European rapeseed oil as a rene-
wable raw material

Use round wicks! Rapeseed wax looks
best uncoloured. It can, however, be
dyed right through with standard dyes,
overdyed with pigments or neon dyes.

Also suitable for the addition of scented
oil for candles (page 70).

Art. 12350

1–	24 kg	€ 6.90/ kg
25–	49 kg	€ 6.30/ kg
50–	99 kg	€ 6.— / kg
100–	299 kg	€ 5.75/ kg
300–	599 kg	€ 5.55/ kg
as of	600 kg	Price on request

Special-effect wax, white

Pellets (20 kg bags)

For overdipping/overmoulding candles.
Can be dyed as required. With instructions!

Ice crystal **Art. 12600**
Velvet **Art. 12610**

1 – 19 kg	€ 14.10/kg
20 – 59 kg	€ 11.90/kg
60 – 199 kg	€ 11.30/kg

Carving wax, white

For forming and carving

The solid wax is warmed up to its working temperature by placing it in water at approx. 45°C.

When melted, carving wax can be coloured with standard dyes or pigments.

500 g	Art. 12800	€ 8.80
1 kg	Art. 12810	€ 14.50
as of 5 kg		€ 13.10/kg

Gel wax, transparent

(900 g or 17 kg container)

For pouring gel candles, suitable for dyeing,
long burning time.

900 g	Art. 12500	€ 16.—
17 kg	Art. 12510	€ 10.90/kg
as of 85 kg		€ 10.15/kg
as of 170 kg		€ 9.75/kg
as of 340 kg		€ 9.40/kg

Modelling candle wax

For modelling candles or sculptures.
Ready-to-use without prior heating.

The coloured modelling waxes can be mixed with each other. The white wax can be coloured with pigments after melting.

250 g tin including waxed wick		
yellow	Art. 13100	€ 6.10
red	Art. 13110	€ 6.10
blue	Art. 13120	€ 6.10
white	Art. 13130	€ 5.95

2 kg container, without wick		
white	Art. 13140	€ 22.—

NB: Do not use standard candle dyes.

Coloured wax cubes

For incorporating in candle moulds,
wax lights and decorating candles

Colours:

White	Art. 13210
Green	Art. 13211
Yellow	Art. 13212
Orange	Art. 13213
Red	Art. 13214
Pink	Art. 13215
Purple	Art. 13216
Blue	Art. 13217
Turquoise	Art. 13218

Packs of 1 kg
as of 5 packs

€ 12.20/pack

€ 11.—/pack

Coloured wax sticks

For incorporating in candle moulds with
pure paraffin

Suitable for flat candle moulds

Stick length 22 cm, pack with 32 sticks,
assorted colours

Colours from:

Yellow to green	Art. 13200	€ 15.—/pack
Golden yellow to red	Art. 13201	€ 15.—/pack
Turquoise to blue	Art. 13202	€ 15.—/pack

as of 5 packs

€ 13.60/pack

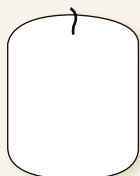

Standard dyes for paraffin and paraffin/stearin

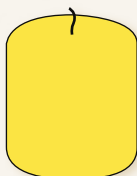

Highly-concentrated grade, easy-to-dose, dust-free pellets. Good mixing properties. Amount required: 1–2 g per kg wax, depending on desired colour intensity (1 g = approx. 25 pellets)

Our standard dyes are aniline dyes (oil-soluble) with good burning properties, which are highly suitable **for thoroughly-dyed candles**. They can be readily mixed into the wax with a metal or wooden rod. They are slightly less light-resistant than the pigments.

The colour shades may differ slightly on account of the four-colour printing.

Neon dyes, for paraffin wax

Suitable for moulding and dipping candles

Highly concentrated quality, in readily dosable and dust-free pellet form. Mixable, for thoroughly dyeing and overdyeing candles.

Amount required:

For thorough dyeing: max. 1 g per 1 kg wax.

Caution: adding too much will adversely affect burning quality!

For overdyeing untreated white candles: 10 g per 1 kg wax. Overdip the candle once or twice.

Important: When thoroughly dyeing candles with these dyes, always select one wick thickness bigger than the thickness specified in the catalogue! Do not heat wax that contains neon dyes above 80 °C!

Yellow No. 50 **Art. 41500**

Pink No. 51 **Art. 41510**

Green Nr. 52 **Art. 41520**

10 g bag	€ 4.—
50 g bag	€ 12.50
100 g bag	€ 20.—
500 g bag	€ 80.—

Colour paste in gold and silver

For stirring into wax and for candle-dipping (not for dyeing candles!)

Also suitable for candles with edges. Easy to use!

Amount required: 10–15 g for 1 kg wax.

Contains solvent

Gold 100 g **Art. 48450** € 24.—

Silver 100 g **Art. 48451** € 24.—

Tip:

Any desired metallic colours can be achieved by mixing silver paste with paraffin wax containing dye.

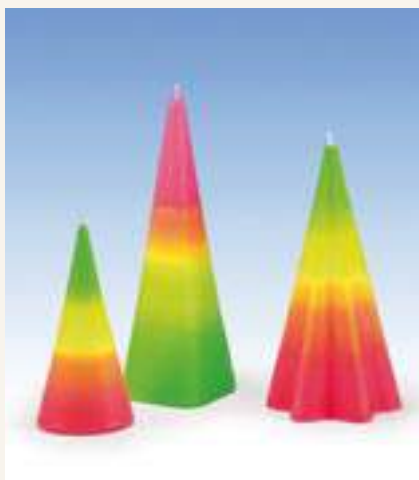

Untreated candles, white

Hand-moulded in high-grade paraffin/stearin wax (80/20)

For overdipping with standard wax dyes, pigments or neon dyes (pages 8, 9 and 11) and individual decoration.

Pigments for paraffin and paraffin/stearin

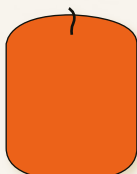

Highly-concentrated grade, in the form of plaques, mixable. Quantity for overdipping: 10–15 g per kg wax*

Contrary to the case for the standard dyes, pigments offer 100% light stability and thus prevent any discolouration of stored candles. Pigments are only suitable **for overdyeing** or overdipping untreated **white candles** or candles coloured with aniline dye and must be thoroughly stirred into the wax compound. If they are used to colour the actual candle, they will cause the wick to become blocked. Modelling candle wax (page 6) may only be coloured with pigments (add 0.5 g per kg wax).

* = The untreated candle should only be overdipped once or twice with pigment.

To overdip once requires 15 g pigment per kg wax, and to overdip twice 10 g pigment per kg wax
(1 level teaspoon = approx. 1 g, 1 heaped teaspoon = approx. 3 g).

Number in brackets = Number printed on reel

Note:

With round wicks of thickness R3 or more, it is essential to observe the braiding direction. When cutting a wick off the reel, knot another loop straightaway – the outside end of the reel must always form the top of the candle.

How to establish the braiding direction:

When looking at the V-shaped braided structure on the flattened side of the round wick, the wider top of the V points towards the candle tip.

Pictures of the different reel sizes in our range are shown below, with a loop knotted on the outside end of the wick.

Garden wick

(round wick)

For use in aluminium trays (page 82) or earthenware pots.

Only for burning outdoors!

Use wick holder Art. 55602 or 55605 (page 14).

For candles of 6–10 cm Ø		
5 m spool	Art. 15900	€ 4.10

Wick holders, metal

For waxed wicks

Round, hole Ø 3 mm, base Ø 15 mm

100 pcs **Art. 55601** € 2.40

Round, 9 mm thorn, base Ø 18 mm

100 pcs **Art. 55602** € 9.50

Spring steel, stainless

Ideal for thicker wicks of Ø 3–11 mm.

33 × 19 × 10 mm, re-usable!

50 pcs **Art. 55605** € 8.30

Dippers for small series

Height-adjustable, with carrying handle

Dipper, small, Ø 9 cm

For a maximum of 8 candles up to a candle height of 35 cm, stainless steel, for size-4/5 melting pots, Type 80 wax melter and Model 75 or 120 melting vat

Art. 33110 € 46.—

Dipper, medium, Ø 12 cm

For a maximum of 12 candles, up to a candle height of 50 cm, stainless steel, for size-5 melting pot, Type 80 wax melter and Model 120 melting vat

Art. 33120 € 52.—

Dipper, large, Ø 23 cm

For a maximum of 36 candles up to a candle height of 50 cm, stainless steel, suitable for Type 80, dipper unit/carousel (page 23–25) and Model 120 melting vat

Art. 33130 € 85.—

Glass fibre wicking, round

For oil lamps. The wick does not burn down!

1 m Ø 3 mm **Art. 15920** € 2.50

1 m Ø 5 mm **Art. 15921** € 3.—

1 m Ø 8 mm **Art. 15922** € 3.90

1 m Ø 11 mm **Art. 15923** € 6.50

Braided wicking

For oil lamps

5 m	strip width 6 mm	Art. 15930	€ 5.—
5 m	strip width 10 mm	Art. 15931	€ 6.90
5 m	strip width 19 mm	Art. 15932	€ 11.10

Wicking reel holders/wick cutters

Robust design in wood, varnished with protected blade

Double stand (for two reels)
Art. 32200 € 70.—

Triple stand (for three reels)
Art. 32300 € 105.—

Wick cutter (single)
Art. 32100 € 35.—

Spare blades, 5 pieces
Art. 31321 € 4.50

Candle stand, in fir/ash wood

For hanging up a maximum of 100 individual

Suitable for public candle-dipping events, schools, homes, sheltered workshops, etc. Robust design in solid wood. Easy to assemble and dismantle. Hooks on front and rear.

Outside dimensions when assembled:
L 155 x W 60 x H 155 cm

Outside dimensions when dismantled:
L 12 x W 60 x H 155 cm

With 100 hooks
Art. 31810 € 255.—

Wax melting and candle dipping

From a small set through to a large melter for continuous operation

Candle-dipping at home

For melting wax in a household saucepan on a cooker or hotplate. The illustration below shows a size-2 melting pot, with a solid handle, combined with the drip ring. The drip ring prevents soiling of the pan, hotplate or cooker. Maximum candle height 35 cm.

See also pages 19–20

Complete (without pan):
Height 53 cm, Ø 27 cm, 1.6 kg
€ 99.50

Wax melter Type 30 Directly-heated, compact version for candle-dipping projects, schools and home use

The illustration shows the Type 30 wax melter with a one-hole cover, a size-4 melting pot and a drip ring. This combination saves energy and prevents soiling of the double boiler. Suitable for up to 6 people. Max. candle height 50 cm.

See also pages 19–22

Complete:
Height 78 cm, Ø 45 cm, 11 kg
Art. 26360 € 490.—

Wax melter Type 30 Combined with special cover for two melting pots

A Type 30 wax melter with a two-hole cover, two size-4 melting pots and a twin drip ring. No soiling of double boiler, low electricity consumption. Suitable for up to 10 people. Max. candle height 50 cm.

See also pages 19–22

Complete:
Height 78 cm, Ø 52 cm, 14.5 kg
Art. 26361 € 722.—

Wax melter Type 30 Combined with a special cover for a large melting pot

A Type 30 wax melter in combination with the one-hole cover, a size-5 melting pot and a drip ring. High wax capacity (23 kg), low electricity consumption, no soiling of the double boiler. Suitable for up to 10 people. Max. candle height 50 cm.

See also pages 19–22

Complete:
Height 78 cm, Ø 45 cm, 13.3 kg
Art. 26362 € 558.—

Wax melter Type 30 Combined with a special cover for four or five size-2 melting pots. Suitable for working with four or five colours

The illustration shows the Type 30 wax melter, combined with a special cover, four or five size-2 melting pots and a drip ring. The double boiler remains clean, low electricity consumption. Suitable for up to 8 people. Max. candle height 40 cm.

See also pages 19–22

Combination with 4 size-2 pots
Height 59 cm, Ø 45 cm, 14 kg
Art. 26363 € 670.—

Combination with 5 size-2 pots
Height 59 cm, Ø 45 cm, 15.8 kg
Art. 26364 € 745.—

Wax melter Type 80 For professional use and continuous operation. For candle-dipping projects, workshops, schools and homes

Using several heating elements ensures that the heat is distributed uniformly around the melting cylinder. Very robust model in stainless steel, maintenance-free. Low energy consumption with a capacity of 32 kg, the wax level falls relatively slowly even when wax is in great demand. Suitable for up to 20 people. Max. candle height 50 cm.

See also page 23

Height 80 cm, Ø 60 cm, 35 kg
Art. 26800 € 3 990.—

Candle-dipping combinations with melting vats

Melting vat, model 75

Combined with a special lid for nine size-2 melting pots and one size-5 (without handles) melting pot. Suitable for nine colours

High-grade, robust model in stainless steel with grid insert and multi-hole lid. Wax can be used as the heating medium instead of water. The melting pots can be readily re-filled by drawing molten wax from the drain valve. If the melting pots are removed, the unit can be employed as a directly-heated melting vat. Low electricity consumption, good thermal insulation.

Suitable for up to 20 people.

Max. candle height 40 cm

See also pages 19/28/29

Complete:

Height 81 cm, Ø 56 cm, 56.5 kg

Art. 26380 € 4 580.—

Melting vat, model 120

Combined with a special lid for seven size-4 melting pots (the middle one without a handle). Suitable for seven colours

Professional model in stainless steel, with grid insert and multi-hole lid. Wax can be used as the heating medium instead of water. The melting pots can be readily re-filled by drawing molten wax from the drain valve. If the melting pots are removed, the unit can be employed as a directly-heated melting vat. Low electricity consumption, good thermal insulation.

Suitable for up to 20 people.

Max. candle height 50 cm

See also pages 19/28/29

Complete:

Height 81 cm, Ø 56 cm, 78 kg

Art. 26381 € 5 400.—

Melting pots in stainless steel and aluminium

Size 1, aluminium Lightweight version	Seamless drawn, wall thickness 0.6 mm, with drip-proof pouring edge Height 22.5 cm, Ø 8.7 cm	Art. 21100	€ 10.80
Size 1a, stainless steel	Wall thickness 0.6 mm, with drip-proof pouring edge and handle Height 26 cm, Ø 8.7 cm	Art. 21101	€ 29.—
Tongs for size 1	Plastic (polycarbonate)	Art. 21110	€ 6.20
Size 2, stainless steel	Wall thickness 1.0 mm, with beaded edge and handle Height 45 cm, Ø 11 cm	Art. 21201	€ 69.—
Size 4, stainless steel	Wall thickness 1.2 mm, with beaded edge and handle Height 60 cm, Ø 16 cm	Art. 21401	€ 153.—
Size 5, stainless steel	Wall thickness 1.2 mm, with beaded edge and two handles Height 60 cm, Ø 25 cm	Art. 21501	€ 198.—
Size 5a, stainless steel	As for size 5 but height 30 cm	Art. 21502	€ 158.—

Note: For melting pots in aluminium, pots made of enamel or aluminium must be used, for melting pots in stainless steel, pots made of stainless steel must be used. Filling quantity see page 93.

Drip rings

Aluminium, seamless-drawn, plug-in

Fits size-1 and 1a melting pot
(outside diameter 22 cm)

Art. 22100 € 25.—

Fits size-2 melting pot
(outside diameter 27 cm)

Art. 22200 € 30.50

Fits size-4 melting pot
(outside diameter 35 cm)

Art. 22300 € 48.—

Fits size-5 and 5a melting pot
(outside diameter 45 cm)

Art. 22500 € 74.—

Twin ring, welded together, fits
size-4 melting pot
(outside dimensions 35 × 52 cm)

Art. 22310 € 135.—

Four-hole ring, stainless
steel fits size-2 melting pot
(outside diameter 44 cm)

Art. 22210 € 105.—

Five-hole ring, stainless
steel fits size-2 melting pot
(outside diameter 44 cm)

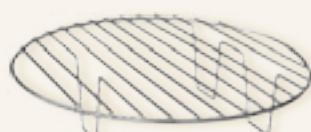

Art. 22211 € 110.—

Grids insert, stainless steel, for wax melter Type 30
A support for wax melting pots in the double boiler

Grid height 15 mm

Art. 24810 € 22.—

Grid height 70 mm

Art. 24820 € 28.—

Drip rings prevent any soiling of the double boiler, the melting pot and the floor. They serve as a funnel for pouring in pellets or liquid wax and are easy to clean.

Lids

Stainless steel, polished on the outside with a bakelite knob
For melting pots and drip rings

For size-2 melting pot

Art. 24200

€ 10.80

For size-4 melting pot

Art. 24300

€ 16.50

For size-5 and 5a melting pot

Art. 24500

€ 31.—

The lids reduce heat loss during interruptions to work.

Wax melter, Type 30

Directly-heated, covered double boiler, 2 years guarantee

Integrated electric heating, temperature control 30–100 °C, safety thermostat, indicator light.

Handles in plastic, pan and base in stainless steel

Type 30 Standard

Capacity: 27 litres
Inner dimensions: Height 29 cm, Ø 35 cm
Outer dimensions: Height 41 cm, Ø 36.5 cm
Power req.: 230 V, 1800 W

Art. 26305

€ 215.—

Type 30 Fully insulated

Capacity: 27 litres
Inner dimensions: Height 29 cm, Ø 35 cm
Outer dimensions: Height 41 cm, Ø 46 cm
Power req.: 230 V, 1800 W
Energy savings: up to 50%

Art. 26315

€ 365.—

Prices inclusive of VAT

Special cover for the Type 30 wax melter, stainless steel

Single-hole cover

For a single melting pot
size 4

Art. 24320 € 100.—

Single-hole cover

For a single melting pot
size 5

Art. 24520 € 100.—

Two-hole cover

For two melting pots
size 4

Art. 24321 € 104.—

Four-hole cover

For four melting pots
size 2

Art. 24322 € 108.—

Five-hole cover

For five melting pots
size 2

Art. 24324 € 112.—

NB:

The covers ensure optimum heat distribution with the tall stainless steel melting pots. The inspection hole makes it easier to check the water level and top up with water.

Dipping bath Type 30

Wax melter, Type 30 with grid insert (height 7 cm),
with single-hole lid and size 5a melting pot.
2 years guarantee

Suitable for overdipping decorated candles and
wax lanterns

Complete:

Height 46 cm Ø 45 cm, 9.2 kg

Art. 26355 € 430.—

Individual components: page 19, 21 and 22

Special lid for dipping bath Type 30

Stainless steel

Single-hole lid

For one melting pot, size 5a

Art. 23510 € 48.—

Prices inclusive of VAT

Wax melter Type 80

For continuous operation, maintenance-free, 2 years guarantee

Highly robust design in stainless steel, twin-walled, great stability, wide drip bowl, electrically heated, temperature control 30–110 °C, safety thermostat, overload protection and indicator light

Type 80

Capacity: 40 liters
 Inner dimensions: Height 60 cm, Ø 30 cm
 Outer dimensions: Height 80 cm, Ø 66 cm
 Power req.: 230 V, 1960 W

Incl. stainless steel lid

Art. 26800

€ 3 990.—

Type 80 with a separately heated tap

Capacity: 40 litres
 Inner dimensions: Height 60 cm, Ø 30 cm
 Outer dimensions: Height 80 cm, Ø 66 cm
 Power req.: 230 V, 2060 W

Incl. stainless steel lid

Art. 26810

€ 4 480.—

With drip bowl Ø 49 cm

Art. 26820

€ 4 480.—

Two-arm dipping unit

For smaller series (up to 216 candles per day)

1 Mobile dipping unit

On 5 casters (3 with locking brakes), including two dippers (max. capacity: 72 candles)

Height 250 cm, depth 145 cm

Art. 28030

€ 3 500.—

3 Wax melter Type 80 (page 23)

Very robust version, pivot arm and drawing rollers with double ball-bearing mounts, easy dipping thanks to guide rods and swivel catch for precise positioning of the dippers over the melting basin. The dippers are counterbalanced via a non-twisting wire rope. These dipping units can also be operated with the medium-sized dipper (page 14) and melting vat Model 120 (page 28).

2 Fixed dipping unit (wall-mounted)

As for the mobile dipping unit but without movable base, including two dippers (max. capacity: 72 candles)

Installation height (top edge of mounting plate)
250 cm, depth 117 cm

Art. 28040

€ 2 850.—

4 Melting vat Model 24 (page 28)

Dipper carousel

For large and small series (up to 850 candles per day)

1 Dipper carousel

Highly robust system, turntable and drawing rollers with double ball-bearing mounts, precise dipper positioning through a spring catch, easy dipping thanks to guide rods, incl. 8 dippers (max. capacity: 288 candles)

Height 255 cm, turntable Ø 180 cm,
Weight approx. 160 kg

Art. 27100

€ 8 990.—

2 Wax melter, Type 80 (page 23)

3 Melting vat (page 28)

4 Finishing tray (page 26)

5 Wiping plate

Infinitely variable height adjustment,
for wiping off drops of wax

Art. 27200

€ 180.—

Precise positioning of the dippers over the melting basin. The dippers are counterbalanced via a non-twisting wire rope. This dipping unit can also be operated with the medium-sized dipper (page 14) and melting vat Model 120 (page 28).

Dipper stand

For small and large series

Rotatable dipper stand

Robust version, for hanging a maximum of 10 dippers (medium and large models, page 14). The dipper stand has double ball-bearing mounts and can be rotated through 360°, dippers not included in the price

Height 102 cm, Ø 150 cm

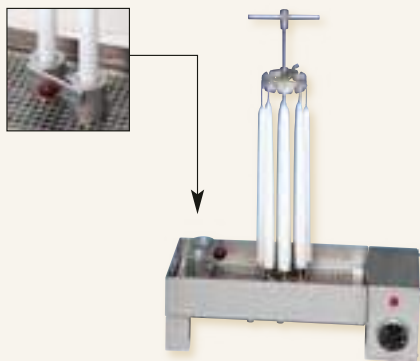

Art. 28020

€ 2580.—

Finishing trays with overflow

For removing the candle ends and bevelling the standing surface
2 years guarantee

Model for small and medium dipper

Robust design in stainless steel, electrically heated, temperature control 20 – 120 °C, safety thermostat and indicator light

Inner dimensions: H 4 cm, L 32.5, W 17.5 cm
Outer dimensions: H 13 cm, L 40, W 18 cm
Power req.: 230 V, 250 W

Including tapering facility

Art. 26110

€ 840.—

Model for large dipper

Robust design in stainless steel, double-walled, electrically heated, temperature control 30 – 110 °C, safety thermostat, separately heated and lockable tap

Inner dimensions: Height 24 cm, Ø 36 cm
Outer dimensions: Height 44 cm, Ø 40 cm
Power req.: 230 V, 1000 W

Including overflow pipe, melt-off grid, tapering facility and lid

Art. 26120

€ 3380.—

Melting vat with drain valve

For melting large quantities of wax, maintenance-free
2 years guarantee

Robust design in stainless steel, double-walled, electrically heated, temperature control 30–110 °C, safety thermostat, overload protection, indicator light, separately heated and lockable tap

Model 24

Capacity: 24 litres/15 kg wax
Inner dimensions: Height 24 cm, Ø 36 cm
Outer dimensions: Height 44 cm, Ø 40 cm
Power req.: 230 V, 1000 W

Incl. stainless steel lid

Art. 27130

€ 2 770.—

Model 50

Capacity: 50 litres/32 kg wax
Inner dimensions: Height 24 cm, Ø 52 cm
Outer dimensions: Height 44 cm, Ø 56 cm
Power req.: 230 V, 2000 W

Incl. stainless steel lid

Art. 27140

€ 3 350.—

Model 75

Capacity: 75 litres/50 kg wax
Inner dimensions: Height 35 cm, Ø 52 cm
Outer dimensions: Height 56 cm, Ø 56 cm
Power req.: 230 V, 2200 W

Incl. stainless steel lid

Art. 27145

€ 3 650.—

Model 120

Capacity: 120 litres/80 kg wax
Inner dimensions: Height 60 cm, Ø 52 cm
Outer dimensions: Height 75 cm, Ø 56 cm
Power req.: 230 V, 2200 W

Incl. stainless steel lid

Art. 27150

€ 4 250.—

Melting vat accessories

Special lid for melting vats

Seven-hole lid

For seven size-4 melting pots (the middle one without a handle)

Art. 23707

€ 185.—

Ten-hole lid

For nine size-2 and one size-5 melting pots (the middle one without handles)

Art. 23710

€ 195.—

Thirteen-hole lid

For twelve size-1a and one size-5a melting pots (the middle one without handles)

Art. 23713

€ 205.—

Flexible drain tube

For series-filling moulds

Connects up directly to the tap on the melting vat. Flexible, electrically-heated, insulated hose, temperature control 20–100 °C, 230 V, 200 W, length 140 cm

Art. 27180

€ 950.—

Support frame on articulated casters

To raise the position of the melting vat when working with the drain tube

For model 24 and 50 melting vats, 5 casters (3 with locking brakes), distance from floor to vat: 140 cm

For model 24

Art. 27131

€ 1 090.—

For model 50

Art. 27141

€ 1 120.—

Circulating-air heated cabinet,

stainless steel, 2 years guarantee

For efficient cleaning of candle moulds and equipment. The cabinet can also be used to heat or keep warm candles that are to be decorated, as well as carving wax (page 6), wax slabs, modelling wax, wax sheets (page 72–74), etc.

With swing doors, shelf and infinitely variable temperature control from 30–85°C.

The shelf to slide in the candle moulds has to be ordered separately.

Outside dimensions: L 100 × W 60 × H 85 cm

Inside dimensions: L 82 × W 52 × H 62 cm

Power supply: 230 V, 2500 W

Art. 28003

€ 1 490.—

Shelf to slide in, for heated cabinet

Non-stick

Dimensions: L 36 × W 26 × H 6 cm

Art. 28005

€ 12.—

Hotplate, 2 years guarantee

For melting down or flattening wax surfaces

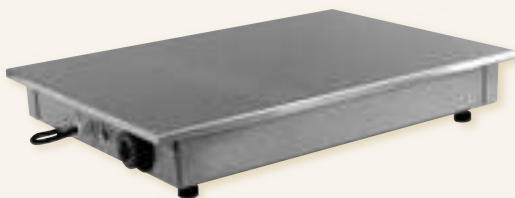

The aluminium hotplate ensures optimum heat transfer. Electrically heated, infinitely variable temperature control from 30–90 °C, indicator light

Dimensions: 36.5 × 54 cm

Power supply: 230 V, 350 W

Art. 26205

€ 488.—

Melting plate, aluminium, 2 years guarantee

For flattening the base of candles

Suitable for all designs of candle (cylinder, pyramid, sphere, etc.). The candle stop plate (stainless steel) is height-adjustable and can be inclined. The melted-off wax collects in the tray.

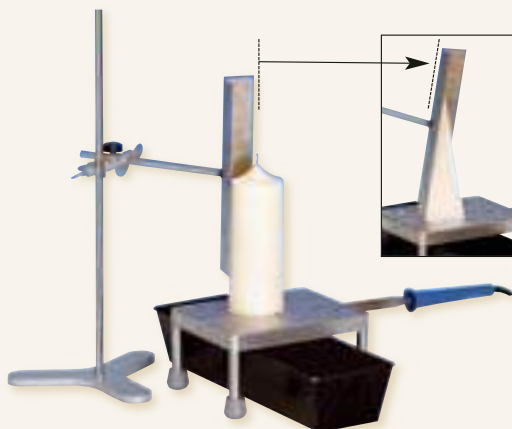

Melting plate: L 22 × W 18 × H 10.5 cm

Power supply: 230 Volt, 80 Watt

Complete: **Art. 26130** € 520.—

Only tripod with stop plate:

Art. 26131 € 180.—

Wax melting and candle pouring

Aluminium pan with three-hole lid (to fit on standardised household pan) and three size-1 melting pots

For melting wax with a household pan (Ø 22 cm), a three-hole lid, three size-1 melting pots, tongs

See also pages 19 and 33

Complete: Height 23 cm, Ø 31 cm, 2,5 kg
Art. 26460 € 98.—

Wax melter, Type 20, with a six-hole lid and six size-1 melting pots

Directly-heated, energy-saving and compact design, comprising a Type 20 wax melter, six-hole lid, six size-1 melting pots, tongs

See also pages 19 and 33

Complete: Height 35 cm, Ø 45 cm, 5,8 kg
Art. 26450 € 245.—

Wax melter, Type 30, with a six-hole lid and six size-1a melting pots

Directly-heated, energy-saving and compact design, comprising a Type 30, stainless steel, wax melter, a grid insert (height 7 cm), six-hole lid and six size-1a melting pots with handle, with the middle one 30 cm high instead of 26 cm

See also pages 19, 21 and 33

Complete: Height 47 cm, Ø 45 cm, 9,3 kg
Art. 26455 € 455.—

Melting vat, model 50 Combined with a special lid for twelve size-1a and one size-5a (without handles) melting pots

For professional use in candle workshops, schools and homes. Solid, high-quality model in stainless steel with a covered double boiler, including grid insert. If the melting pots are removed, the unit can be used as a directly-heated melting vat

See also pages 19, 28 and 29

Complete: Height 56 cm, Ø 56 cm, 46 kg
Art. 26382 € 3 980.—

The melting pots are held firmly in place and the double boiler remains clean. Reduced heat loss.

Aluminium pan

Robust aluminium pan, thick-walled Ø 22 cm, height 17.5 cm

Art. 21800 € 41.50

Three-hole lid, stainless steel

For standardised pan Ø 22 cm and three size-1 or 1a melting pots

Art. 23100 € 20.50

Type 20 wax melter

Directly-heated double boiler, 2 years guarantee

Integrated electric heating, temperature controller 30–100 °C, safety thermostat, indicator light, double enamel coating, base and handles in plastic

Capacity: 16 litres
Inner dimensions: Height 18 cm, Ø 35 cm
Outer dimensions: Height 30 cm, Ø 36.5 cm
Power req.: 230 V, 1800 W

Art. 26400 € 125.—

Six-hole lid for Type 20/30 wax melter

Stainless steel

For six size-1 or 1a melting pots

Art. 23610 € 55.—

Bain-Marie, stainless steel

For simple heating of small wax quantities on a cooker hotplate

Double walled, water content 250 ml, whistles when water boils, incl. lid

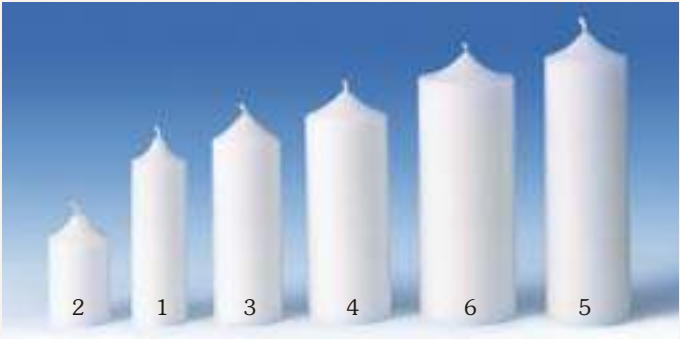

Capacity: 1.4 kg wax
Inner/outer dimension: H 13/16 cm, Ø 13/16 cm
Melting time: Only 20–25 minutes

Art. 21810 € 25.50

Single-part candle moulds in transparent and break-proof polycarbonate
 For pouring paraffin and paraffin/stearin candles (heat-resistant up to 120 °C).
 The “Wick” column shows the ideal flat wicking for paraffin and paraffin/stearin wax.

Tools for carving wax and soap

Professional tool set for carving wax (page 6)
and soaps (page 98)

Blades in stainless steel

5 parts **Art. 31311** € 43.—

Heat applicator

A practical aid for applying serviettes or dried
grasses to candles

230 V, 5 W **Art. 31140** € 23.50

The heated tip attachment causes
the serviette or grass to bond to
the candle by melting the wax un-
derneath it.

Photo transfer paper

For transferring photos, pictures and text to
candles

Size: 210 × 297 mm (A4)

The pictures must be printed using a PC and
an ink-jet printer (do not use a laser printer or
photocopier!)

NB: Dip candle surface in pure paraffin (at
90 °C) or apply candle gloss varnish (page 71)
as protection.

1 sheet	Art. 45900	€ 3.40
as of 5 sheets		€ 2.90/sheet
as of 25 sheets		€ 2.60/sheet

Marbling dyes

(based on organic solvents)

For marbling candles, wax lights and decorative wax. Can also be used for other materials such as paper, glass, metal and plastic.

Easy-to-use, with instructions included!

Pots of 20 ml, colours:

Yellow	Art. 42070

Gold glimmer	Art. 42110
Silver glimmer	Art. 42111

€ 2.90

Candle and soap paints

(water-based)

For painting candles and soaps.
The colours can be mixed together.

Paint pots containing 15 ml, colours:

White	Art. 42020	€ 2.50
Yellow	Art. 42021	€ 2.50
Fuchsia	Art. 42025	€ 2.50
Red	Art. 42029	€ 2.50
Light blue	Art. 42031	€ 2.50
Blue	Art. 42032	€ 2.50
Black	Art. 42037	€ 2.50
Light green	Art. 42038	€ 2.50
Gold	Art. 42022	€ 3.50

Small wax painting pan

For painting candles with melted candle wax

The wax only flows through the outflow pipe when it touches the candle surface.

Robust small pan in brass, with a wooden handle

Art. 31145 € 12.—

Rub-off film

For inscribing and decorating candles

Incl. glue stick; the glue improves the adhesion of the rub-off foil to the candle. Adheres particularly well to wax sheets (page 72–74)

Strip 15 cm × 300 cm

Gold	Art. 48100	€ 7.80
Silver	Art. 48110	€ 7.80
Glue stick separately	Art. 48115	€ 4.70

Decorative pins

With Swarovsky elements

For decorating candles

Heat pin in water at 40 °C and insert into candle

25 pcs Ø 3 mm	Art. 48550	€ 7.20
25 pcs Ø 4 mm	Art. 48551	€ 8.20

Scented oils, highly concentrated

For pouring candles! Stir into melted wax.

Add about 2% (20 ml per kg wax).

Vanilla	Art. 49001
Lavender	Art. 49011

Apple	Art. 49031
Lilac	Art. 49041
Rose	Art. 49051
Lemon	Art. 49061
Sandalwood-orange	Art. 49081

50 ml	€ 7.30
as of 5 bottles, same scent	€ 6.20/pce

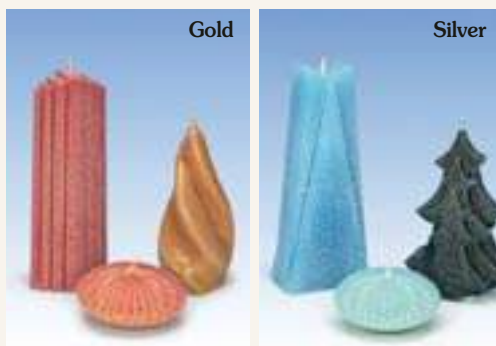

Decorative lacquer

For overdipping candles
(contains solvent)

The decorative lacquer gives white or plain-coloured candles a delightful, sophisticated look. Also suitable for candle dipping, goes a long way!

Gold, 750 ml	Art. 48411	€ 39.50
Silver, 750 ml	Art. 48421	€ 39.50

Brocade lacquer, transparent with white brocade (solvent-free, water-soluble)

For overpouring and overdipping candles.

Rough surface structure, goes well with glitter (see next product)

250 ml	Art. 48610	€ 13.90
--------	------------	---------

Glitter, polyester

For decorating candle surfaces

Stir into brocade lacquer or candle gloss varnish and pour over candle.

Add max. 10 g glitter for 100 ml lacquer

Gold	50 g	Art. 48510	€ 6.90
Silver	50 g	Art. 48520	€ 5.70
Pearl	50 g	Art. 48530	€ 8.90

Candle gloss varnish, transparent

For protecting decorated candles
(solvent-free, water-soluble)

Applied with a brush

100 ml	Art. 48301	€ 5.60
250 ml	Art. 48300	€ 11.20

Flat brush, real bristle

Size 16	Art. 31360	€ 10.50
---------	------------	---------

Metallic lacquer

For overdipping, painting or dabbing candles, wax sheets and wax tiles. Goes a long way, with good covering power! (water-soluble, solvent-free)

Tip: Mix your own metallic colour shade in a small beaker using the silver metallic lacquer and our candle paints (page 69)!

100 ml		
Gold	Art. 48320	€ 8.90
Silver	Art. 48321	€ 8.90

Decorative paste for wax

To apply to the wax surface with a brush.
Goes a long way!

Ideal for rough or structured surfaces

50 ml		
Gold	Art. 48460	€ 13.80
Silver	Art. 48462	€ 13.80
Touch of gold	Art. 48461	€ 13.80

Bronzing powder

For decorating candles

Dust on or apply with a brush and fix permanently in place with a hairdryer.

Gold	ca. 10 g	Art. 48210	€ 5.90

Candle pouring kit

In a gift box

Contents:

Wax melting pot, height 225 mm, Ø 87 mm, tongs, cylindrical candle pouring mould Ø 50 mm, height 140 mm, spherical candle mould Ø 65 mm, 5 m wicking, 1 kg paraffin/stearin wax, yellow, red and blue wax dyes (colours can be mixed), instructions

Art. 19219

€ 36.—

Floater kit

In a gift box

Contents:

Wax melting pot, height 225 mm, Ø 87 mm, tongs, 6 cavity floater mould, 50 wicks with wick tabs, 1 kg paraffin/stearin wax, yellow, red and blue wax dyes (colours can be mixed), instructions

Art. 19229

€ 29.50

Candle recycling kit

In a gift box

For making new candles
from old!

Contents:

Wax melting pot, height 225 mm,
Ø 87 mm, tongs, taper candle
mould Ø 65 mm, height 140 mm,
5 m wicking, sieve, filter cloth, in-
structions

Art. 19319

€ 25.50

Candle gel kit

In a gift box

Contents:

Wax melting pot in tin plate
(height 11.8 cm, Ø 11.8 cm) with
tongs, two glasses (height 8.5 and
13.5 cm), 900 g candle gel, 6 pcs
glass sea animals, 5 pcs special
wicks (length 180 mm) and instruc-
tions

Art. 19500

€ 39.80

Candle rolling kit

In a gift box

Simple cold method

Contents:

500 g beeswax, 100% pure, 3 m round wicking, instructions

Art. 19149

€ 28.—

Large candle-dipping kit with beeswax

In a gift box

Contents:

Stainless steel wax melting pot (height 45 cm, Ø 11 cm) with a stable handle, 4 kg beeswax, 10 m assorted wicking and instructions

Art. 19110

€ 95.—

Small candle dipping kit with beeswax

In a gift box

Contents:

Aluminium wax melting pot (height 22.5 cm, Ø 8.7 cm) with tongs, 2 kg beeswax, 10 m assorted wicking and instructions

Art. 19120

€ 42.—

Flare material kit, small

In gift packaging

For using up wax and candle leftovers to make classical flares

Max. flare length: 50 cm

Contents:

3 m flare fabric, 6 wooden handles, 6 drip protectors, 5 assorted wax sheets, instructions

Art. 19350

€ 15.—

Flare material kit, large

For using up wax and candle leftovers to make classical flares

Max. flare length: 50 cm

Contents:

10 m flare fabric, 20 wooden handles, 20 drip protectors and instructions (without wax sheets)

Art. 19351

€ 27.50

Prices inclusive of VAT

Modelling candle wax kit

In gift packaging

Contents:

250 g yellow, 250 g red, 250 g blue,
6 wicks with wick tabs, instructions

Available in any value and made out to the person you are giving it to.

Size: A5 **Art. 37250**

Precautionary measures

Due to the risk of fire, it is essential for wax (flash point 180 °C) to always be heated indirectly, i.e. in a double boiler or in a special melter with a safety thermostat. Wax should not be melted on a gas cooker in view of the naked flame.

Boiling water can cause serious injury. Where there is a risk of people tripping or falling, vessels that are full of water must be checked for their stability and secured, if necessary.

Wax-dyes and scented oils should not be kept with food and must be kept out of reach of children.

It is advisable to take out liability insurance for public events.

Raw materials: amount required for public candle-dipping events

How much wax do you need?

Melting pot	Filling quantity	Minimum quantity required
No. 1 resp. 1a	0.9 kg resp. 1 kg	2 kg
No. 2	2.8 kg	4 kg
No. 4	8 kg	12 kg
No. 5 resp. 5a	22 kg resp. 10 kg	28 kg resp. 14 kg
Wax melter Type 80	30 kg	36 kg

Depending on the diameter and height, you can dip 5 to 15 candles with the minimum quantities required that are set out above.

Example: 1 Christmas tree candle weighs approx. 20 g
1 candle, Ø 2 cm, height 25 cm, weighs approx. 50 g
1 candle, Ø 4 cm, height 30 cm, weighs approx. 190 g

At public candle-dipping events, some 30 to 100 kg wax will be required at each melting point depending on the duration and scale of the event.

Wicking required per kilogram of wax:

Wick No. 1	5–10 metres
Other wick thicknesses	3– 5 metres

Shipping information

We deliver our goods by post, courier service or forwarding agent. Prices for transport and packing vary according to weight, transport distance and country. The transport and packing costs will be stated on your invoice and are borne by the customer. We will gladly let you know, upon request, how much the delivery of your order will cost.

The package weight includes the weight of the goods ordered plus the packaging material. We would like to point out that there is no minimum order value for your orders. In general, your order will arrive within ten working days of the date on which the goods are dispatched from our warehouse.

Instructions for Candle Dipping

1. Place the wax in the melting pot and heat the pot to 70 – 73 °C in a bain-marie, Fig. 1. The temperature of the wax is decisive for achieving a smooth candle surface. Because of the risk of fire, never melt wax directly in a saucepan.
2. Stir in the desired wax dye (standard quality). Do not add too much: 1–2 g dye for 1 kg wax (to test the colour, pour some liquid wax into a bowl of cold water). Too much dye can adversely affect the way your candle burns. Dyes can be mixed with one another.
3. Decide on the diameter of the candle and select the appropriate wick. Knot a loop at the end (Fig. 2), which will also form the tip of the candle (observe the braiding direction on round wicks, see under “Note” on page 10 of the catalogue).
4. Dip the wick into the liquid wax up to about 1.5 cm below the loop, Fig. 3. The first dipping operation needs to last somewhat longer (approx. 5 seconds), to ensure that the wick fabric is fully impregnated. Hold the wick over the melting pot and let the excess wax drip off and pull the wick straight, Fig. 4.
5. The candle must be allowed to cool (to about 35 °C) after each dipping operation. To test the temperature, hold the candle against your cheek (if there is no perceptible temperature difference, the next dipping operation can commence). It is important to maintain a uniform rhythm during candle dipping: immerse swiftly – wait a short time (approx. 1 second) – remove swiftly – drain – cool – immerse again, and so on. If the candle has cooled down completely due to work being interrupted, the next dipping operation should last somewhat longer (about 5 seconds).
Contrary to the case for beeswax candles, paraffin and paraffin/stearin candles can also be cooled in cold water (at approx. 20 °C) rather than in air. It is then important to dry the candles with a cotton or drying tissues (page 91) each time.
6. Once the candle has reached the desired diameter, cut off the wax hanging at the bottom of the candle while it is still warm, Fig. 5. Then roll the base of the candle at an angle of 45° while applying slight pressure, Fig. 6. After this, press the candle onto the work surface until it is standing straight. Cut off the loop in the wick before lighting the candle.

Important

Cover the work surface and wear an apron! Check the temperature of the wax with a thermometer that covers a range of 40 to 100 °C.

Warning

Dip candles only with adult supervision. Because of the danger of injury, a candle must be heated right through before being cut through its centre. Cold candles must be dipped an appropriate number of times (depending on their thickness) before being cut. Melting wax in a saucepan or over a naked flame is a fire hazard. Wax vapours can ignite at 180 °C. Never leave candles to burn unattended and always place on a fireproof base.

Instructions for Pouring Candles

1. Fill the wax melting pot with wax and heat indirectly to 80–90 °C (176–194 °F) in a pan of hot water, Fig. 1. The correct temperature is crucial if the candle is to have a smooth surface and is to be successfully released from the mould. Because of the risk of fire, never melt wax directly in a saucepan!
2. The desired colour shade will be obtained by stirring in the wax dye (standard quality). Mix with caution: 1–2 g dye for 1 kg wax (to test the colour, pour some liquid wax into a bowl of cold water). Too much dye can adversely affect the way your candle burns. Dyes can be mixed with one another.
3. The wick must be the right size for the diameter of the mould. With non-cylindrical shapes, take the average diameter as the standard.
4. Tie a double knot at the end of the wick, Fig. 2, and trim to the required length; a slanting cut will make it easier to insert the wick into the mould. Insert the wick from the tip and secure it with the enclosed needle at the other end of the mould (pierce wick with needle), Fig. 3. Make sure that the double knot fully seals the opening in the neck of the mould.
5. Fill the mould with liquid wax, Fig. 4. As the wax cools a crater will form; to fill it, pour more wax in as necessary. For moulding in layers, Figs. 5 and 6, the mould can be tilted (using a stand, see page 49, or a bed of sand).
6. When the wax has cooled completely, cut off the knot at the candle tip. Following this, the candle can be removed from the mould. If the candle proves difficult to release, placing it in a refrigerator for a short time can help.

Important

Cover the work surface and wear an apron! Make sure the mould is clean and dry beforehand. Apply only as much of one colour shade as you are going to work with. Check the temperature of the wax with a thermometer. Clean out the mould with hot water and then wipe with a dry cloth or kitchen tissue.

Warning

Pour candles only with adult supervision. Melting wax directly in a saucepan or over a naked flame is a fire hazard. Wax vapours can ignite at 180 °C (356 °F). Never leave candles to burn unattended and always place on a fireproof base.

€ 23.80

Instructions for Moulding Soap

1. **Preparations:** cut the block of soap into small pieces, Fig. 1
2. **Melting in a double boiler:** place the pieces of soap in a heat-resistant pot (such as a soap melting pot) and heat to 60 °C (140 °F) in hot water, Fig. 2. Caution: if the soap becomes too hot, it can discolour. Soap must never be melted directly in a saucepan on account of the risk of fire.
Melting in a microwave oven: place the pieces of soap in a heat-resistant pot suitable for a microwave oven (caution: do not use a metal pot) and heat for 20 seconds at the highest setting. Check whether the soap is liquid. If not, then put the pot back into the microwave and heat for a further 5 seconds at a time until the pieces of soap have liquefied (caution: soap heats up within a matter of seconds in the microwave. Overheating can cause the soap to discolour. Exceeding the heating period of 5 seconds will create a fire risk!).
3. **Colouring:** a colourless soap can be given the desired colour by adding and melting soap colour stick (approximately 5 seconds in the microwave). Approximately 4 cm (1½") of colour stick should be used for 1 kg (2 lb 4 oz) of soap respectively 1 colour stick for 200 g (7 oz) of soap (colour test: pour a little liquid soap onto a sheet of white paper). The colours can be mixed with each other.
4. **Perfuming:** add the desired special perfumed oil for soap (do not use any other perfumed oils!) and stir in carefully (rough stirring will lead to air bubbles). Add 10–15 ml (2/5–3/5 fl. oz.) special perfumed oil to 1kg (2 lb 4 oz) soap. Note: in the soap-making set, the soap colour sticks are already perfumed.
5. **Moulding:** if a thin skin forms on the surface in the melting pot, then this should be carefully stirred into the liquid or moved away to the side. Now slowly pour the liquid soap into a heat-resistant plastic mould, Fig. 3. If you wish to include decorative objects in the soap, only half fill the mould to begin with using transparent soap. After waiting about 20 minutes put the objects in place and completely fill up the mould (use only heat-resistant items which will not irritate the skin and do not pose any risk of injury!).
6. **Removal from the mould:** once the soap has completely cooled down, it can be readily released from the mould, Fig. 4. If it proves impossible to remove the soap from the mould, then the mould should be placed in the fridge for a short time and, after this, a knife used to trace between the soap and the contour of the mould (at a depth of approximately 2mm (1/10")). After removal from the mould, the soap should be allowed to dry for at least 24 hours. The soap should be wrapped in cling film or cellophane for storage.

Important

Cover over the working surface. Make sure that the mould is clean and dry when you pour in the soap. Use hot water to clean moulds and melting pots.

Warning

Pour soaps only with adult supervision Melting soap directly in a saucepan or over a naked flame is a fire hazard. Soap vapour can ignite at temperatures above 180 °C (356 °F).

General Terms and Conditions

Validity

The following terms and conditions are accepted when an order is placed. These terms and conditions take precedence over any arrangements to the contrary which are submitted by the person placing the order or which are included on their documents.

Changes

We reserve the right to make changes in the form of product improvements and shape or colour adjustments for individual articles.

Prices

All the prices stated in our catalogue and Internet shop are inclusive of VAT but exclusive of packaging as of the Exagon warehouse. The publication of a new price list renders all previous price lists invalid.

We reserve the right to make price adjustments on account of exchange rate fluctuations or unforeseeable circumstances.

Delivery times

Most articles can be dispatched rapidly from our warehouse. Workshop installations, such as heated cabinets can generally be dispatched within 6 to 8 weeks of receipt of the order. Delayed delivery does not relieve the ordering party of their purchasing commitment. Claims resulting from delayed delivery are excluded.

Dispatch and insurance

Packaging and dispatch or transport costs and any transport insurance are borne by the customer. All deliveries are at the risk of the ordering party. Unless specified otherwise, we select what we consider to be the best type of dispatch and the best dispatch route, but without any guarantee. We reserve the right to make partial deliveries insofar as this appears in the interests of the rapid fulfilment of an order.

Transport damage

Any transport damage must be notified to the corresponding transport establishment without delay (post office, parcels service, railway, forwarding agent, etc.). We cannot supply free replacements if no claim has been submitted to the carrier.

Complaints, guarantee

Complaints regarding visible defects must be submitted within 14 days of receipt. Once this deadline has expired, the consignment is deemed to have been accepted.

Returned products will only be accepted after notification by telephone; they must be returned, post-paid, in transport-proof packaging. We retain the right to charge either the full price or part of the price for damaged products that are no longer in their original condition when received. In the case of justified complaints, we undertake to repair

the products concerned, provide replacements or reduce the bill. Other guarantee claims are excluded, insofar as legally permitted. The guarantee will cease to be valid if customers make changes or conduct repairs themselves or have this done by third parties without our agreement. No liability can be accepted for consequential damage.

Custom-made products

We cannot take back custom-made products or articles that we have purchased especially for customers.

Terms of payment

Our invoices must be paid within 30 days of the date of the invoice without any deductions. If the payment deadline is exceeded, default interest equivalent to the standard bank lending rate will be charged, without special notification being necessary to this effect. Security or an advance payment may be required before orders can be accepted and executed. In the event of advance payment, an advance-payment discount of 3% will be applied. Orders from our Internet shop can be paid for directly by credit card (Eurocard/Mastercard and Visa). We also accept payment by credit card (Eurocard/Mastercard and Visa) for all other orders.

Deliveries abroad

Deliveries can only be made abroad if payment is made in advance or by credit card. We grant a discount of 3% on all advance payments. If customers take the goods across a customs border themselves, we are obliged to charge the VAT. We can refund this upon receipt from the customer of the original export certificate stamped by the customs.

Reservation of ownership

Products supplied by us remain in our possession until they have been fully paid for. Cheques only count as payment once they have been successfully encashed.

Privacy

Our customer data undergoes electronic data processing in the course of our business dealings. The provisions of the Swiss Federal Law on Data Protection are observed insofar as the data of individuals is concerned.

Place of fulfilment and competent courts

The place of fulfilment for delivery and payment is Zurich (CH) or Gottmadingen (DE); any disputes are to be settled by the courts of Zurich. Application of the UN Sales Convention is excluded.

Miscellaneous

If individual provisions of these Terms and Conditions prove to be invalid in part or in their entirety, this will not affect the validity of the remainder of the agreement. Price and type-setting errors excepted.
